

Insulin Guidelines Committee

JANUARY 29, 2016

DIABETES COALITION OF CALIFORNIA ANNUAL MEETING

JOHN E. SILVA, M.D., CO-CHAIR

Committee Members

- ▶ Kimberly Buss, M.D.
- ▶ Barbara Liepman, MSN, CDE – Co-chair
- ▶ Nathan Painter, Pharm.D., CDE
- ▶ John E. Silva, M.D., Co-chair

2015

- ▶ Goal: To update the DCC's existing Ambulatory Insulin Guidelines to inform and improve California's primary care providers in current diabetes management and care
- ▶ Our full committee has met via phone conference on two occasions and is truly realizing the responsibility that these guidelines portend, for our present context.
- ▶ The existing guidelines, from 2010, are available on our website. This is quite dated the many technical and scientific changes in the field and in the delivery of care considering health care reform.

Next steps

- A. Opportunity for team members to meet at the conference
- B. To discuss and agree about the scope and audience for these guidelines. That would help us balance varying and sometimes competing concerns of a guideline effort (e.g. the general versus specific nature of a guideline, authenticity of process, patient-centeredness).
- C. To confer about how our team can work most effectively
- D. To understand define the team's support needs and consider the range of financial options for them
- E. To discuss the implications of pursuing grant funding, if that is an option that is valued

How you can help?

- ▶ We really welcome other attendees to join us during the convention with your thoughts, ideas and experience about insulin care of your patients and family
- ▶ Thank you!

Questions?

Thank you

- ▶ John Silva, M.D.
